ABOUT ME

Computer Engineering undergraduate at PCCOE with a strong foundation in data structures and algorithms, and a keen interest in Data Science, Web Development and Machine Learning. Actively enhancing coding skills through hands-on problem-solving on platforms like LeetCode, HackerRank, and CodeChef. Passionate about applying knowledge to real-world projects and continuous learning.

EDUCATION

Pimpri Chinchwad College of Engineering, Pune (2023 - 27)

Bachelor of Technology in Computer Engineering — **CGPA: 8.67**

RELEVANT COURSEWORK: Object-Oriented Programming, Frontend Development, Data Structures & Algorithms, Data Science, Database Management Systems, Machine Learning, Operating Systems, Cloud Computing

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python
 - **Web Technologies:** HTML, CSS, JavaScript, EJS
 - **Frameworks/Libraries:** Node.js, Express.js, jQuery, Pandas, Scikit-learn
 - **Databases:** MySQL, MongoDB, PostgreSQL
 - **Data Visualization:** Power BI
 - **Tools & Cloud:** Git, GitHub, AWS
-

PROJECTS

- 1) **Cloud-Based Student Performance Prediction Dashboard | Machine Learning & Cloud Computing | [GitHub ↗](#)**
 - Developed a cloud-based application using Python and Random Forest to classify student academic performance into Excellent, Good, Average, and At Risk, achieving approximately 97% accuracy.
 - Evaluated the model using precision, recall, F1-score, and confusion matrix to assess classification performance.
 - Deployed the application on AWS using EC2, S3, RDS MySQL, VPC, Application Load Balancer, and Auto Scaling, with IAM roles and Security Groups.
 - 2) **Campus Interview Experience Platform | Node.js, Express.js, MongoDB, JavaScript | [GitHub ↗](#)**
 - Developed a full-stack platform for students to browse, search, and filter campus interview experiences, interview questions, preparation tips, and upcoming campus drives.
 - Implemented user registration/login, password hashing with bcrypt, role-based functionality, bookmarks, notifications, and admin content moderation.
 - Integrated Nodemailer for email/OTP verification and developed REST APIs using Express.js and MongoDB to manage users, companies, interview experiences, questions, answers, and campus drives
 - 3) **Employee Productivity & Salary Portfolio Prediction | Python, Pandas, Scikit-learn, Machine Learning | [GitHub ↗](#)**
 - Developed an ML system to predict salary packages and recommend career roles using clustering, regression, and classification.
 - Processed 8,358 employee records through data cleaning, missing-value handling, encoding, and feature preparation.
 - Achieved $R^2 = 0.90$ for salary prediction, 71% test accuracy for classification, and 0.7780 Silhouette Score using K-Means.
-

CODING PROFILE

- Leetcode: [sahilpawar45](#)
- Codechef: [sahilpawar45](#)
- HackerRank: [sahilpawar45](#)

CERTIFICATIONS & ACHIEVEMENTS

- **Copyright Registration:** Smart Solution for Student Housing: To Find Affordable Paying Guest - Certificate No. LD-20250169700 | August 2025
 - **LeetCode:** Solved 300+ questions | 100 Days Badge - 2025 | 50 Days Badge - 2026
 - **AWS — Udemy | 2026**
 - **Web Development — Udemy | 2026**
-
